**Attention Small to Mid-Market Business Owners:**

Business owners everywhere are looking for better results with their online marketing strategies. More leads. More customers. More revenue. But there's something blocking the path. The old ways just aren't working any longer.

## Maybe you can relate. Which of these problems would you like to fix?

- 1 Business is slow** and you want to get the phone ringing and the orders coming in.
- 2 You've got traffic, but they're not turning into leads.** Or you've got leads, but they're not the right type of leads and they are not converting into customers.
- 3 You're not happy with the design or functionality of your website.** Maybe it's outdated. Maybe it's just not giving you the results it should.
- 4 Your branding isn't making the impact** you were hoping for, and you're starting to feel invisible in the crowded marketplace.
- 5 Your online marketing strategy is performing poorly** and isn't bringing in enough traffic, growing your list or generating enough revenue.

If any of this sounds familiar, don't worry – it's not just you. You're not the only one struggling to grow your business in a competitive, rapidly changing environment.

## Here Are the Problems Affecting Your Results

- What worked just a few short years ago doesn't work anymore...
- Businesses without a comprehensive marketing and branding strategy end up floundering and getting kicked in the teeth by the competition.
- Businesses without cutting-edge websites suffer, because seasoned web users expect top-shelf design.
- But the vast majority of small businesses are still working off last year's playbook. Maybe you are too. It's not your fault – you have a business to run, so you don't have time to study the fast-changing digital landscape.
- That's where I come in...
- I can help. Together we can grow your business and make your offers more visible in the marketplace.
